2018 Chongqing Economy; Overall Stability Digital Economy

The Chongqing Productivity Development Center and the Chongqing Institute of Comprehensive Economics jointly released the 2018 Chongqing Economic Climate Report. The report pointed out that since 2018, under the background of the complicated international and domestic environment and the downward pressure on the domestic economy, Chongqing's economic climate has been generally stable, and the main economic indicators are basically stable, but it is under pressure.

The report pointed out that in the first three quarters, Chongqing's investment has rebounded, consumption growth has slowed down, import and export have been running steadily, demand dynamics structure has remained stable, and investment, consumption and regional net outflows have contributed 50% to 49.6% of the city's economic growth. , 0.4%. Fixed asset investment increased by 7.2% year-on-year, and total retail sales of consumer goods increased by 9.5% year-on-year. New formats such as service consumption and experience consumption flourished, driving the growth of improved consumption, and the growth rate of consumption of gold, silver, jewelry, sports and entertainment products, and communication equipment reached 15.7%, 14.7%, and 26.9%, respectively. 28.6%; the new format of online consumption and consumption developed rapidly. The online retail sales of online enterprises increased by 37.4% year-on-year; rural consumption continued to be faster than that of urban areas, and the total amount of rural communities increased by 11.8%. The import and export of foreign trade was 368.7 billion yuan, up 13.9%; of which exports were 235.41 billion yuan and imports were 133.29 billion yuan, up 16.2% and 10% respectively.

China-European Banlie (Chongqing) "German Port of Germany - Chongqing Orchard Port" arrived in the Orchard Port of Liangjiang New District, passing through about 11,000 kilometers.

Deepening Economic and Trade Cooperation between the Upper Reaches of the Yangtze River and the Upper Reaches of the Rhine River "German Port of Mannheim - Chongqing Orchard Port"

The goods transported by this class are mainly auto parts. After passing through Poland, Belarus, Russia, and Kazakhstan, they enter China from Horgos. After arriving at Orchard Port in Chongqing, they will be allocated at Orchard Port. The port of Mannheim is the second node opened by CEIBS (Chongqing) in Europe and will be the starting point for the establishment of the China-European class (Chongqing) in Germany. The successful operation of this class not only opened the prelude to the joint development of Orchard Port and Mannheim Port, but also deepened the economic and trade cooperation between the upper reaches of the Yangtze River and the upper reaches of the Rhine in Europe, which is conducive to promoting the better cooperation between the two rivers and Germany. Cooperation projects in logistics, trade, intelligent manufacturing, etc.

24 Smart Industry Summit Forum held in Handan Aerospace Science and Industry Group

More than 600 experts, scholars and entrepreneurs from various related fields gathered to focus on emerging data, cloud computing and artificial intelligence. The development trend of technology and innovative application, sharing the advanced concepts and experiences of the smart industry. At the forum, Aerospace Science and Industry Group also signed a batch of smart industry cooperation agreements with the city.

In cooperation with the Chongqing Forestry Bureau, the two sides will comprehensively use mobile Internet, big data, cloud computing and other technologies to jointly explore a new model of Chongqing's smart forestry construction in the new era. Strive to build a smart forestry integrated regulatory decision-making system covering the whole city by

2020, develop subsystems such as forestry big data management analysis and forestry resource management supervision and protection, establish a map of forestry resources, and promote forest resources, forest land protection and utilization, and forestry disasters. The forestry management work such as prevention and control is intelligent, and a number of smart forestry demonstration districts and counties are built to realize the goal of "perceiving a network, a map of forest land, supervising one-stop, sharing a platform", and building Chongqing into a leading wisdom in the country. Forestry demonstration city.
